PLANNING AND PLANTING SERVICE

PLANNING the garden and home landscape is just as important in the development of a real home as planning the house. Well-planned grounds provide a harmonious setting for the house. Let us work with you and help you with your planting problems. Artistic and satisfactory landscape effects are the result of careful planning and the proper use of the right plant material. Our Landscape Department is maintained as part of our service to our customers, so that you may realize the utmost pleasure and satisfaction in the use of our materials.

The ability and experience of Bulk's Nurseries are reflected in the landscaping of many fine home-grounds, estates, and public plantings throughout Long Island and suburban New York. "PLANTED BY BULK'S NURSERIES" is synonymous with first-class workmanship, tasteful arrangement, and lasting satisfaction.

We will gladly draw sketches and plans to fit your particular needs, whether it be for a complete treatment of the entire grounds, a foundation planting, a special planting of any kind, or a revamping of an established planting. This service, in most cases, is rendered free of cost, except where elaborate plans, specifications, and special trips are necessary, in which case a small fee will be charged, which will be credited to our customer's account when order is placed.

Phone Babylon 444, or drop us a card and our representative will be glad to call on you to make suggestions and offer advice, without obligation to you. Our service extends throughout entire Long Island and the Metropolitan area.

Appointments at your home, any day including Sunday, will be gladly made and kept.

GARDENING FOR MORALE

In these disturbing days, gardening is an economic, moral, and spiritual force. It is a defensive measure against discouragement and despair. Working in the soil with one's own hands, cooperating with the forces of nature in the creation of things beautiful, cannot fail to have a steadying and healing effect upon mind and soul.

Let us preserve our landscapes, foster our floral interests to bolster national morale

An Invitation To You TO VISIT OUR NURSERY

You will find a visit to our Nursery very interesting and worth while. Many acres of highest-quality stock in a wide range of plant varieties are available for your inspection and selection.

General Directions For Ordering and Our Terms

Always give address and desired time of delivery; otherwise we forward by the most economical route. Practically all our deliveries will be made by our trucks. Our free-delivery radius, on orders amounting to \$20.00 or more, on plants as listed in this Catalogue, extends 30 miles from our Nursery. This enables distant customers to get the benefit of local prices. During planting season, loads are combined for each locality at least twice a week. Beyond this 30-mile limit, a small charge will be made for delivery to cover cost, unless otherwise arranged at time of sale.

The cost of planting, if we do it, is borne by the purchaser. Our charge merely covers the cost of labor, fertilizer, etc.

PLANTING SEASONS

Evergreens may be planted from the time the frost leaves the ground until the latter part of June, though early planting is much preferred. Some varieties can be moved satisfactorily during the summer months. August, September, and October are excellent months.

Plant shrubs, trees, and fruit trees from the latter part of March until June, and from the middle of October until the ground freezes. Pot-grown Roses can be moved the entire summer and continue to bloom. Small potted shrubs and vines also available.

SALES DEPARTMENT

TO FACILITATE and make it convenient for home-owners to select and take along plants in their cars, we are maintaining a Sales Department where choice, freshly dug plants are taken from the Nursery and put on display, thereby saving you the time of covering our complete nursery, which is extensive.

These plants are ready to load into your car, and many customers have developed their grounds by gradually picking up plants as they can afford them. Deliveries can be arranged by our truck, at slight additional cost.

From time to time, special sales will be conducted, and you will find our Sales Ground a place where dependable nursery stock can be obtained at unusually attractive prices.

Experienced nurserymen are at your service and will be glad to offer advice and make suggestions.

Flower seeds, lawn seed, fertilizers, and insecticides are stocked for your convenience.

To serve you, the Sales Department will be open on Sundays, holidays, and in the early evening during the planting seasons.

Annuals and Bedding Plants available in spring and early summer.

GUARANTEE

If nursery stock purchased from us and planted by us at prices as listed in this catalogue has been given proper care after planting, we will replace any plants that die from natural causes within one year from date of planting.

Planting and delivery costs are borne by the customer. Guarantee is subject to account being paid within 30 days, and does not cover losses from drought, severe winter, storms, insect injury, disease or other factors beyond our control.

If at replacement time plants as originally supplied are out of stock, credit will be applied to other plants the customer may select. At no time will responsibility exceed original purchase price.

GOOD foundation plantings require careful thought and planning. A wise choice of material will afford many years of lasting beauty.

BULK'S Nurseries specialize in the better type of house plantings and our representative will be delighted to make suggestions without obligation.

A planting at Babylon, L. I.

A combination planting of Yews and Broad-leaf Evergreens at Rockville Centre, L. I.

PLANTING is the best investment. Returns are practically guaranteed. Nothing bolsters up one's morale more than attractive home grounds and a garden that can be lived in.

A lovely new home in Rockville Centre with a planting that blends nicely with the quaint architecture and natural setting.

YEWS of various types combined with good broad-leaf evergreens such as Andromeda, Azaleas, Leucothoe, Ilex in varieties, etc., make up the very best type of foundation planting.

ORNAMENTAL and SHADE TREES

IN ADDITION to the trees which are valued for their shade, there are flowering trees which, at different times during the spring and summer, shower the lawn with their bloom. Do not forget that while shade trees add materially to the property value and landscape charm of your home, the initial cost is very small as compared with the enjoyment that you receive. The average shade tree is a long investment and returns your money manifold throughout the years of its usefulness.

The abbreviation "cal." means the caliper or diameter of the tree 6 inches above the ground.

FLOWERING SHRUBS

WHETHER planted individually or collectively, shrubs are an important feature in the adornment of any grounds. In groups they can be made to emphasize some feature of the lawn, to screen the garage, the laundry-yard, or some unsightly view. Among borders of the lawn, along walks and drives and in corners, collections of shrubs may be gathered that will give a succession of bloom from early spring until fall. In the list that follows will be found shrubs for all such purposes.

Except where noted otherwise, a charge will be made for digging shrubs with ball of earth (B&B.), as follows: 1 to 2 ft., 15 cts. each; 2 to 3 ft., 20 cts.; 3 to 4 ft., 25 cts.; 4 to 5 ft., 35 cts.; 5 to 6 ft., 50 cts.; 6 to 7 ft., 75 cts.; 7 to 8 ft., \$1.

A GOOD FOUNDATION PLANTING IS A LASTING INVESTMENT

THE design of the house, surroundings, exposure, and the right choice of plant material are all fundamental considerations.

Many evergreens and shrubs are not suited for Foundation Planting and soon grow too large and become unmanageable.

The broad-leaf evergreen shrub plays an important part in a good foundation planting. Most of the broad-leaf evergreen shrubs are of low to medium height and will stay in scale for years. In addition to their green foliage over the winter, in many cases they produce flowers at various seasons.

BROAD-LEAF EVERGREENS

WITH few exceptions, no grounds, either small or extensive, should be without some representative of this rich and interesting group of plants. They endure shade, and their rich blossom and foliage effect makes them almost indispensable. Certain varieties of this class, such as *Rhododendrons*, *Azaleas*, and *Laurel*, ordinarily grow more satisfactorily and show to better advantage when planted in rather heavy masses. A deep, cool, moist subsoil, with proper drainage, is ideal. As a rule, they dislike lime, or limestone soil, and success will be more certain on such soils if they are planted in woods earth or mulched with peat moss. Oak leaves are ideal for covering the ground beneath them.

A BORDER OF HARDY PERENNIALS

IT HAS often been said that a garden is a place where we tend plants, but a garden, to most of us, is something more significant. It is a place where we endeavor to make a series of colorful growing pictures throughout the year. To be sure, the kind of pictures we make depends on our individual taste and knowledge.

But it does not follow that experience in gardening is denied. On the contrary, it is the reach of all who would experience and the advice of us help you. We are spe-

IN this group are contained some of the most valued plants for landscape effects. The diversity of color and habit of growth in this class provide truly "a plant for every place and purpose," some for limited areas of foundation plantings or for bed and border uses, others for screens, hedges, windbreaks, and for group and specimen plantings. They are always desirable for both summer and winter effects.

ABIES - The Firs

Abies concolor. *White Fir.* Rapid-growing evergreen, with long, bluish green needles, and of symmetrical, upright habit. Splendid as a lawn specimen, as a contrast with the darker foliage of other trees, and is also useful in screen and border plantings. It is a tree of great dignity.

Evergreen Hedges

From time immemorial people have used hedges and fences to protect their property from intrusion and to secure privacy. Until recently an evergreen hedge meant quite an expense, but they have now come down to a price-level within the reach of every home-owner.

ARBORVITÆ

Pyramidal. Because of its shapely habit of growth and deep green foliage, this makes a very fine hedge.

TREES and shrubs can be moved at almost any time of year if the proper care is given them. All too often, however, home-owners are not able to care for large trees conveniently when they are moved in the summer months. Experience has taught nurserymen that trees can easily be moved after the ground is frozen. The frozen soil makes possible the removal of the tree-roots with a large ball of earth. Then, too, trees moved in the winter months are in a dormant condition and are less likely to be retarded in their growth.

THE value of a well-formed shade tree on your home-grounds can hardly be over-estimated. If your area is unusually limited in size, you can create the same effect by using a small, flowering tree. Trees in the garden provide, in addition to welcome shade in the summer months, the pleasing effect of interesting shadows on the lawn. Very often a well-placed tree can be used as the center of interest in your garden. It can be the focal point of a vista from your window or your porch. Trees often help to frame interesting views in the garden. Trees planted in pairs can be used for more formal effects. Indeed, trees in leaf or in flower or, for that matter bare of leaves, are pleasant adjuncts to any well-planned garden. Does your garden need a tree? Let us tell you what we know about desirable trees and their uses.

A FEW PRACTICAL HINTS ON PLANTING

Always keep roots covered when plants are out of the ground. Dig hole large enough to receive plant without bending roots. Break up subsoil and mix it thoroughly with rotted stable manure.

Set plants slightly deeper than they stood at the nursery.

Work in good soil among roots so as to leave no air-pockets.

Fill hole and tamp soil down thoroughly with the heel of shoe or tamping tool.

Leave slight depression around plant to catch the water, and water thoroughly.

BULK'S HARDY ROSES

ROSES—the mere name is an inspiration to garden lovers. Nothing can take the place of the Rose. Almost every home has room for at least a few. Roses will grow in any fertile soil, but are much improved in bloom, fragrance, and beauty by rich soil, liberal fertilizing, and good cultivation. Branches should be well cut back early each spring.

All Roses, except field-grown Hybrid Teas, carry our regular guarantee

PERENNIALS

IT IS no wonder that these old-fashioned hardy garden flowers continue to increase in popularity, for there is not a time during the whole flowering season when some hardy perennial is not in bloom, and when, during the late summer, few shrubs are in blossom, these little plants may be depended on for attractive display. Plant perennials this year in the flower-bed where you have been using annuals. Every year you have to replace annuals, whereas the perennials come up each season with very little work or expense.

Prices for Perennial Plants, except where otherwise noted: Strong field-grown plants, 25 cts. each, \$2.75 per doz., \$20 per 100 plants; large clumps, 35 to 50 cts. each

Create Your Own Defense Herb-Garden

Your Country needs herbs. Due to the war many sources of supply are cut off. Growing of herbs is simple and interesting, and you can aid the Defense Program by raising your own.

Many herbs have great decorative value in the garden as well as utility value. We are offering the following collections which will afford a good start on this interesting phase of gardening.

Burnet. Ornamental fern-like foliage. Used for flavoring soups, cold drinks or punch.

Chives. For soups, cheeses and salads.

Horehound. Dried leaves used for Horehound candy, also Horehound ale.

Hysop. Ideal plant to edge the flower border. Used to enrich soups.

Thymus vulgaris. Good herb plant for border of flower garden. For seasoning soups, poultry stuffings, etc.

Salvia vulgaris. Sage. Used with sausages and stuffings.

Mint Collection

Apple Mint (*Mentha rotundifolia*). The leaves are used to flavor drinks.

Curly Mint (*Mentha crispa*). The aristocratic spearmint.

Orange Mint (*Mentha citrata*). Leaves are round with a brownish purple tinge. Quite different in taste from all other Mints.

FRUIT AND NUT TREES

FRUITS

In the extremities of the lawn or upon the adjoining lot, plant fruit trees. They will bountifully reward you in the fruit they yield, which you will enjoy eating right from the trees or in winter as preserves and jam. The fruit-garden can easily be made a part of the scheme for beautifying your property. Flowers along the walk to the orchard will brighten the way and provide blooms for cutting.

Spraying of Fruit Trees. For best results we recommend three sprayings: First, during the winter; second, after the blossoms fall; and, third, about two weeks later. This will control the most prevalent insects and fungous diseases attacking fruit trees on Long Island. We have men experienced in this kind of work who are available at a moderate cost.

BEFORE PURCHASING PLANTS CONSULT WITH US

The right way to get the best out of every dollar spent in plants is to consult the specialist. While plants are sold as merchandise they cannot be regarded from the same standpoint as other merchandise. They are living things meant to grow and to accomplish a certain purpose. It is not a matter of quantity or price. It is a matter of getting a plant suitable to your soil and the situation in which it has to grow. This is our specialty—we are interested in your results. We want to help you to select plants and use them in the right way. Consult with us now while the planting season is here.

RELAXATION is even more necessary in wartime than in days of peace. Gardening makes an excellent hobby and one of the most worthwhile and beneficial "escapes."

The home planting of various types of fruit (including berries and nuts), and the growing of herbs offer interesting and useful diversion, and flowers will do so much to brighten our perspective.
